

See All Sides of You with Tailored Leader Assessments

Effective leadership requires a deep understanding of oneself and the impact one has on others. Our Intentional Leader Model[®] leverages cutting-edge psychological assessments to give leaders the clearest picture of their identity, reputation, and influence. This comprehensive approach ensures leaders "see all sides" of themselves to uncover blindspots and maximize potential.

Insight, Grounded in Science

The intentional Leader Model is a leadership development framework based on three integrated dimensions (Identity, Reputation, and Influence) that collectively represent a leader's total impact.

Each level of the Intentional Leader Model is complimented by a scientifically developed psychological assessment.

First Class Experience

Choose the assessments you need, and our team will handle the entire process. We will coordinate sending the assessments to you (or your client), collect the results, and have a doctoral-level organizational psychologist compile them into a comprehensive report. This report will include an overview of the findings, developmental recommendations, and the original assessment results for your records.
